Well it was really hard to decide to recommend this game or not after 10 minutes of gameplay. I like the idea of the game and I'm sure I will play more of this game. So I recommend this game for the gameplay itself. For the cons, the music is horrible and I find it is missing the basic things as a menu to check your high score. As soon as it is game over I don't even have a chance to check it. They should place the keyboard settings in the menu so you don't get confused right away. https://www.youtube.com/watch?v=5jJKS5mTRlM.
