## About This Content

Værøy is a small community located on the southern tip of the Lofoten archipelago. Known for its unpredictable weather, long summer days and nights lit by the dancing auroras during the winter season.

Airport Værøy is a very accurate recreation of the island, including both Værøy Airport (ENVY) and the newer Værøy Heliport (ENVR) located on the southern tip of the island. The whole island is modelled in high detail to recreate the scenic terrain that this part of Norway is known for. The airport itself is nestled at the bottom of a 450 meter cliff on the northern side of the island, an area known for rapidly changing winds and downdrafts. The scenery also includes a custom Aurora Borealis effect creating a majestic atmosphere, especially during the dark winter months.

## FEATURES

- Realistic recreation of Værøy Airport (ENVY) and Værøy Heliport (ENVR)
- Fully compatible with X-Plane 10 and XPlane 11
- Accurate terrain model with sloped runway

- 
- Highly accurate 3D elevation model of the island
  - Photo-realistic textures covering the whole island
  - All airport buildings included in high detail
  - Custom city and harbor models
  - Highly detailed ground taxiway and runway textures
  - Custom windsock and flag animations
  - Custom runway and approach lights
  - Custom PLASI lights
  - Realistic night time effects
  - Terminal interior models for both the airport and heliport included
  - Seasonal variations included (requires seasonal plugin)
  - Custom Aurora Borealis effect

Title: X-Plane 11 - Add-on: Aerosoft - Airport Vaeroy

Genre: Simulation

Developer:

Jo Erlend Sund

Publisher:

Aerosoft GmbH

Release Date: 15 Dec, 2017

b4d347fde0

English,German

---

From this post I only have played for about an hours worth of this game single player. At first it's a little strange to play takes a little while to get use to the buttons (Remapped mine now) but as you play the game it sucks you in wanting more which is great.

I really enjoy this game so far and recommend you at least give it a try! :D. can't link my fb account so wast of time becuse i lose everything. There is no reason for the reviews complaining about having to pay to play. I played for almost 2 hours straight. Paying just refills the hints quicker but hints can be found online if you want to do it that, I don't. Also it isn't too hard to figure out what and what can do stuff. Most my elements were made without hints. And the hints refill quick enough on their own. Stop being stupid and giving bad reviews to a good game because you are too impatient to wait for your hints to refill. This is a fun and awesome game.. For those who think there's battlers here, there are none for a good reason. It's supposed to be like one of those horror survival packs for horror survival games. But all in all, this is really good.. Free now, for a quick 100% game - go for it.

Nothing special about it, wasnt worth the Pricetag it had.  
But its free now - so go ahead.

---

I like this game very much,

For what this game represents to me I believe it has a good mix of economical, military, and diplomatic management.

It is an awesome game and achievement considering that it was made by one person.

I can't wait to see what comes next and hope my little contribution can help to develop this project further.

. Chinese plz :). I really dont like attacking small developers so hate doing this but...

This does for casual pool games what "grass simulator" did for FPS games. Honestly, this is not even ready for early access, alot more work should have been put in before opening to the public to have a go.

Before getting others to play this, I would:

1) make it work, so balls for example dont get super-glued to the table as they sometimes are.

2) add sound, fix some of the most obvious bugs

3) add THE RULES OF POOL, I mean player 1 pots they get another go, but when player two pots they dont and for some reason missing the ball doesnt count as a foul???

Good luck with the project, but to be honest I wouldnt have made it public at all yet (not even for free).. Pros: Strong engine. Awesome online community. Can watch grandmasters games and all tournaments. 6 month playchess/chessbase subscription. Easy chess engine import and implementation. No brainer for anyone who loves to play chess.

Cons: Tutorials are hidden and lacking in content . . . (find them in your "C:\Users\[NAME]\Documents\ChessBase\Media files\" folder. Crazy number of options with no documentation. Not really for beginners who wish to learn without playing online (but then again, the best way to learn how to play chess is to . . . play chess, not read books or tutorials).

Overall, the cons are minimal and can be ignored. If someone wants to learn how to play chess, YouTube has a TON of free content. Fritz allows for amazing analysis of games, very large chess database (which is easily expandable via numerous file type support) and online kibbitzing with some of the best players on the planet.

I highly recommend this for anyone who is serious about chess.. Similar to another reviewer, I support every single game that mentions Ancient Greek Mythology.
